

Band Ohne Namen (B.O.N), Boys

Band Ohne Namen (B.O.N)

No.1

Boys

Lyrics: g. gross, c. capek , a. humpe

Music: g. gross, c. capek

Hey girls, have you ever thought about
About all of those little doubts
That keep comin' up in a boy's mind
When you just smile,

Cause baby, how should he know what you really feel
If that look was fake or real,
Or if he's the 5th or 6th guy
To whom you smile

Baby, think about the way that you treat a boy,
Cause no one likes to be treated like a toy,
If you'd really like him to spend the night,
Then baby, go and tell him right

Refrain:

Boys - now i'm talking about
Boys - 'cause you don't know about
Boys - with your love we are happy
Boys - oh, i like being one of them
Boys - now i'm talking about
Boys - oh, the hyped up and psyched up
Boys - always thinking about lovely.
Boys

And now i'm thinking that the time is right for a hot night,
To make you hold me tight and make you feel right.
And if there's something that you want that i got,
You can have it all night, non-stop.

I wanna treat you right and take you higher and higher,
I wanna hold you tight and make you hot like fire,
I wanna stay all night, i wanna quench your desire,
Was there something i forgot? i think not!

But girl now, hey, how should i know what you'd say
If i'd ask you to play for a night and a day,
Would you say, hey babe, i'd like you to stay,
Or would you say, no, no, no, no way.

Girls, if you want us to stay, you gotta say so,
And if you want us to leave, you gotta say no,
Is it friendship or the real deal?
Girls, tell us what you want, what you need, what you feel!

Refrain

Hey girls, if you like a boy, then you know
That it's alright to make a show
You can play a little hard to get
Just to make him sweat

But baby, if you keep him waiting too long,
Then one day, he might be gone,
So just tell him what is right
And what you like

Baby, think about the way that you treat a boy,

Cause no one likes to be treated like a toy,
If you'd really like him to spend the night,
Then baby, go and tell him right

Refrain
