

Barbados, Sweet Little Angel

Like a child you whisper to me
"Lay your body next to mine"
And I Pray in silent darkness
That tonight is here to stay
Every second we're together
So precious to me, babe
And if you close your eyes and listen
Heaven's calling out your name

I wanna lay my hand all over
Let's be scandalous tonight
And as we're drowning in each other
Every move just feels so right

You are my sweet little angel
There's a secret place in heaven
I know your love can take me there
I'm calling for my sweet pretty baby
Know without you I am falling deeper down
When you're not around
Sweet

We can sail in holy water
Forget space, time and place
Without a single care or notion
We can hide without a trace

Like shadows die we're turning
to the land of make believe
When your holler turns to silence
Then it's only you and me

You are my sweet little angel
Sweet pretty baby
I'm calling for my sweet little angel
Know without you I am falling deeper down
When you're not around - oh

I pray in silent darkness
That tonight is here to stay
Show me the way
Just show me the way
We float around together
to the silence of our love
I want you to know
I need you to know know know know know

Sweet little angel
I'm calling for my sweet pretty baby

You are my sweet little angel...

Angel
