

Barbra Streisand, Love & Learn

Love and learn, they say we love and learn
Learn the facts of love
Each in his turn
Learn that love will soothe and love will burn
It will hurl you to heaven and then down again
Give you hope, give you heartbreak
Love and learn like me that love is strange
Sweet and bitter ride
That one and nothing can change it
Love and learn like me that love is strange
It will warm you in winter and chill in spring
Invade your nights then one day be gone
Love and learn so your heart may wiser be

Love and learn that love's mad, gay and sad, good and bad
Nothing like you've had but you can't
Heaven it seems
You give your love to your man
All the love that you can
Never do you dream
He will take it and go one day
Now you know all there is to know about
There you go
Wise to love but still without it
Love and learn that you learn
Not a thing at all
