

Bardot, Poison

Bardot

Bardot

Poison

You better stop better run away

You better listen to what I have to say

I'll keep you hanging on the line

With just one kiss I will blow your mind

Your desperation makes you feel insane

Fever running high you will never be the same

[Chorus]

Don't you treat me bad

Don't you make me sad

Our love could be deep as the ocean

If you can't be true

I've got news for you

Just remember I can be poison

Some people say that I'm hard to tame

They know that trouble is my middle name

To dangerous what you want from me

This chemistry in my body

I've got you scared and now your running blind

Don't make me mad

Cause you know I won't be kind, oh so kind

[Repeat chorus]

Don't give empty reasons baby

Cause I don't want your lies

And don't think you can deceive this poison inside

[Repeat chorus to fade]
