## Barenaked Ladies, Trust Me

One, two..

I was surprised at how incredibly fast you were to come up and ask for a light
I was amazed at just how matter of fact you were in taking me back for the night
I only crave the sugar on the pill
I hope that you will

Trust me, trust me To let you down, You know that somebody got there first Trust me, trust me To let you down, My fingers crossed while my lips are pursed Trust me, I don't know where I'm going, you can drop me there Don't understand how the roles are reversed and now it's me that's freaked out by the chase The holy trinity are there in your purse: a condom, Obsession, and mace It's easier if I'm on my way So anyway you'll... Trust me, trust me to let you down, You know that somebody got there first Trust me, trust me to let you down, My fingers crossed while my lips are pursed Trust me, I don't know where I'm going, you can drop me there I want you, you want me I want you not to want me I need you to need me

To leave me
Needing you to leave
Trust me, trust me
to let you down,

You know that somebody got there first

Trust me, trust me to let you down,

My fingers crossed while my lips are pursed

Trust me,

I don't know where I'm going,

you can drop me there

Trust me,

Trust me to let you down

Trust me to let you down

Trust me to let you down

Trust me to let you down
