

# Barenaked Ladies, Trust Me (Previously Unreleased)

One, two  
I was surprised at how incredibly fast you were  
To come up and ask for a light  
I was amazed at just how matter of fact you were  
In taking me back for the night  
I only crave the sugar on the pill  
I hope that you will  
Trust me, trust me to let you down  
You know that somebody got there first  
Trust me, trust me to let you down  
My fingers crossed while my lips are pursed  
Trust me, I don't know where I'm going  
You can drop me there  
Don't understand how the roles are reversed  
And now it's me that's freaked out by the chase  
The holy trinity are there in your purse  
A condom, obsession and mace  
It's easier if I'm on my way  
So anyway you'll  
Trust me, trust me to let you down  
You know that somebody got there first  
Trust me, trust me to let you down  
My fingers crossed while my lips are pursed  
Trust me, I don't know where I'm going  
You can drop me there  
I want you, you want me  
I want you not to want me  
I need you to need me  
To leave me, needing you to leave  
Trust me to let you down  
You know that somebody got there first  
Trust me, trust me to let you down  
My fingers crossed while my lips are pursed  
Trust me, I don't know where I'm going  
You can drop me there  
Trust me to let you down  
You know that somebody got there first  
Trust me to let you down  
My fingers crossed while my lips are pursed  
Trust me to let you down  
Trust me to let you down  
Trust me to let you down  
Trust me to let you down
