

Barenaked Ladies, Trust Me (Previously Unreleased)

One, two

I was surprised at how incredibly fast you were
To come up and ask for a light
I was amazed at just how matter of fact you were
In taking me back for the night
I only crave the sugar on the pill
I hope that you will

Trust me, trust me to let you down
You know that somebody got there first
Trust me, trust me to let you down
My fingers crossed while my lips are pursed
Trust me, I don't know where I'm going
You can drop me there
Don't understand how the roles are reversed
And now it's me that's freaked out by the chase
The holy trinity are there in your purse
A condom, obsession and mace
It's easier if I'm on my way
So anyway you'll

Trust me, trust me to let you down
You know that somebody got there first
Trust me, trust me to let you down
My fingers crossed while my lips are pursed
Trust me, I don't know where I'm going
You can drop me there

I want you, you want me
I want you not to want me
I need you to need me
To leave me, needing you to leave

Trust me to let you down
You know that somebody got there first
Trust me, trust me to let you down
My fingers crossed while my lips are pursed
Trust me, I don't know where I'm going
You can drop me there

Trust me to let you down
You know that somebody got there first
Trust me to let you down
My fingers crossed while my lips are pursed
Trust me to let you down
Trust me to let you down
Trust me to let you down
Trust me to let you down
