Barlow Girl, Stay With Me

Hopeless, getting through this night And life is not dying in this fight I'm begging you to deliver me ooh ooh ooh Confused why you won't take this pain from me My steps never felt so hard The end never look so far but If you won't take me out Then please take me through this Stay with me so I won't leave And make me see that this is not forever 'Cause all I need is your love pulling me What is the reason for this night Is hope found in fullness with no light Does strength grow in our greatest fears God I pray something good will come from this pain With you here I know I don't go alone I am yours and so Through the fire I'll go
