Barney, Tinkerputt's Song

Mi, mi, mi, mi, mi, mi
My name's Profesor Tinkerputt
You may think its funny but I like it very much
I moved right here and plan to stay
To build my toys and by the way
(Uh, uh, uh)
These toys are mine so please don't touch
As you can see I've made a lot of toys
I just invent them for myself.
I play with them and they make lots of noise
And then I set them back on the shelf
I spend my time making lots of new inventions
I use a little bit of everything I've got
I found a motor in my attic, made a toy that's automatic
And to turn it on I touch this spot
As you can see I've made a lot of toys
I just invent them for myself
I play with them and they make lots of noise
And then I set them back on the shelf
I spend my time making lots of new inventions
I use a little bit of everything I've got
I took a look around my cellar and I found an old propeller
Not to mention this old teapot
As we can see he's made a lot of toys
He just invents them for himself
(That's right)
He plays with them and they make lots of noise
And then he sets them back on the shelf
My name's Profesor Tinkerputt
You may think its funny but I like it very much
I moved right here and plan to stay
To build my toys and by the way
(Uh, uh, uh)
These toys are mine, so please don't touch
