

# Bass Astral x Igo, Planety (Planets BBC Earth)

I always thought I'm all alone  
so brother stay  
don't leave me, don't go  
The universe is cold  
so now that I know, you give me a little warmth

It's too bad, I see  
It's all black  
so to fill me with dreams  
there's no one else I'll be  
i know that we're trapped here forever

Tell me how to steal a little light  
from the big old sun  
Teach me how to briss threw lights  
with the starshines  
Prove me, that there is somewhere home  
so I'll can sleep with the all of my fears

all around it's getting darker  
and you're the only one equal to me  
and I will wait for you till the mornin'  
the time is the only thing I feel x2

tell me how to steal a little light  
couse all around it's getting darker  
teach me how to briss threw lights  
couse you're the only one equal to me  
prove me, that there is somewhere home  
so I'll can sleep with the all of my fears x2
