

# Bayside, Dear Your Holiness

Hey mom, daddy left me here alone  
Someone save me, someone save me  
Hey god, I'm out here on my own  
So now will you save me now

I think its funny you've been quiet for so long  
When you're quiet no one proves you wrong  
And dear your holiness  
Your army's safe and sound  
Down here dying for you

And I don't know how they found me, found me here  
And I don't know how they found me, found me here

Maybe you can trick a lot of them  
Maybe if you fool the best of them  
The rest will come around

We're all scared  
So they dressed you up in all these  
Different names  
I've gotta find peace with myself  
Before I give you all  
Before I give you anything at all

I think its funny you've been quiet for so long  
When you're quiet no one proves you wrong  
And dear your holiness  
Your army's safe and sound  
They're down here dying for you

And I don't know how they found me, found me here  
And I don't know how they found me, found me here

Maybe you can trick a lot of them  
Maybe if you fool the best of them  
The rest will come around (around)

Been thinking that there's something more  
And that you'd come down and you tell me yourself  
Now I realize its just a waste of time  
Another penny thrown down the well

And I don't know how they found me, found me here  
And I don't know how they found me, found me here  
And I don't know how they found me, found me here  
(Dear your holiness, army's safe and sound)  
And I don't know how they found me, found me here  
(Dear your holiness, army's safe and sound)

Maybe you can trick a lot of them  
Maybe if you fool the best of them  
They'll come around
