BBMak, Don't Look Down

You and I go way up high
In the dark, tell me where the light's gonna come from now
Is it you, was it me?
Fallin....
Out of hope, a tightrope
After all baby you should know,
not to heed the crowd
All that talk's just a fall and..
Love is a high wire act
We've got to get our balance back
And I know we can still do that

Chorus
If you don't look down (don't look down)
Don't fear now (don't fear now)
We've already lost our way
The memory of yesterday
Is still strong enough to light the way
Don't look down (don't look down)
We can rebound (we can rebound)
Whatever may lie ahead
Keep your eyes on me now
And baby, don't look down.

A stary sky, a lullaby
Is all we need to fortify
What is weakening
Wasn't you, it was me
Running...
to get out, I want back in
I wanna end all this suffering
and I do believe...
A second chance is coming
Love is a high wire act
Got to be an acrobat
And I know you can still be that

Chorus
If you don't look down (don't look down)
Don't fear now (don't fear now)
We've already lost our way
The memory of yesterday
Is still strong enough to light the way
Don't look down (don't look down)
We can rebound (we can rebound)
Whatever may lie ahead, keep your eyes on me now
And baby, don't look down

Don't listen to the crowd
I know the sky is ominous and stormy (stormy)
I know it's hard to find real shelter here
Inside you feel it's too far to be falling (falling)
But baby, don't you fear

If you don't look down (Don't look down, you should never look down)
Don't fear now (Don't fear now, you should never fear now)
We've already lost our way
The memory of yesterday
Is still strong enough to light the way
Don't look down (don't look down)
We can rebound (we can rebound)
Whatever may lie ahead
Keep your eyes on me now
And baby, don't look down

And baby, don't look down

Don't look down, you should never look down (Don't look down)
Don't fear now, you should never fear now (Don't fear now)
Don't look down, you should never look down
Don't fear now, you should never fear now
