

Beartooth, My New Reality

Weighed down cause I waited
Face down on the pavement
Told the reaper "One more night"
Guess I'm just persuasive
Bloodstains I'm not stainless
Wore it out, I'm shameless
Check my wrist I'm out of time
Why I got no patience?

Floating on the wave till it's breaking
Never change the ride
Keep the challenge till I make it

Got everything in front of me
Turned into the person I was born to be
Trying to make these memories and legacies
Living on for centuries
I think my wildest dream is my new reality

Dealt with my emotion
Futures been refocused
On my tombstone when I die
Cause of death devotion
Diamond casket frozen
50,000 roses
Celebration of my life
Don't need no condolence

Manifest my best until I'm dead
Living like I got more life behind me than ahead

Got everything in front of me
Turned into the person I was born to be
Trying to make these memories and legacies
Living on for centuries
I think my wildest dream is my new reality

So high up I'm weightless
Found another dimension
I see the kingdom coming
The future's my creation
The future's my creation

Got everything in front of me
Turned into the person I was born to be

I've got fucking everything in front of me
Turned into the person I was born to be
Trying to make these memories and legacies
Living on for centuries
I think my wildest dream is my new reality

I think my wildest dream is my new reality
