

Beats And Styles, Take it back

Feeling kinda' low, got nowhere to go
i'm bored out of my mind
i'm still on the run, she still thinks she's the one
i feel i need some time

bridge:

somehow we will always be connected
somehow there will always be a way, come on now

chorus:

you can take it back, one day

take it back, one day

you can take it back, one day

take it back, one day

finally i'm free, the fear of being me

is long gone and i'm alright

you must understand that i'm a better man

wish you could have seen that side

bridge

chorus

good thing going on

now that thing is gone

we got to keep on moving

look back and i smile

happy for a while

but times are always changing

brige

chorus

i want you all to stand up and make yourself heard

you can do it if you want, come on

we can do it if we want, come on

you can do it if you want, come on

we can do it if we want, come on

chorus
