Beck, Totally Confused

I'm totally confused by you I'm totally confused by you

Ten foot man Makin' my lunch You'll never understand I want you so much

And I never never want it And I never never want it And I never never want it And I never never want it

I'm totally confused by you I'm totally confused by you

Screamin' in my face Whisper in my ear Put me in a suitcase With the can of beer

And I never never want it And I never never want it And I never never want it And I never never want it
