

Becoming The Archetype, Autopsy

If my body was broken open and you could look inside
Would you only find flesh
Only the useless parts of an obsolete machine
Would there be any sign of life
Or would you only find death
Would there be any evidence of a human soul trying to escape
If a flame once burned within this shell
Set me on fire one last time
Is there a clear division of soul and spirit, marrow and joint
Can the human body still give you glory even in death
May the ashes tell the story of what work was done within
May my soul pause to witness as this body goes up in flame
Set me on fire
