

# Bee Gees, Bodyguard

It hurts me when you cry  
when you feel the love is gone.  
Don't give up on us when you got so much to believe in.  
And so I beg you please stay yeah.  
Danger in the night,  
a flame that never dies  
in a world of lonely faces  
you need someone to survive,  
a love like yours should never live alone.

Let me be your bodyguard, (I can be useful to you)  
we can just get excited, stop before we go too far.  
Let me be your bodyguard. (Living in my protection)  
we can just get ignited, lost inside  
it's only you and me.

## VERSE 2:

There's things you shouldn't do  
You lose your self-control  
Should the eyes of a perfect stranger  
Take you down to a new sensation  
Just turn back to me  
Don't wait till it's gone  
Don't go where you don't belong  
In a world of pain and sorrow  
Every wish is your command  
A heart like yours  
Should always find a home.

I know the signs and I'm telling you you're living on borrowed time,  
but a heart needs love like a flower needs rain,  
like I'm making you mine.

Let me be your bodyguard, (I can be useful to you)  
we can just get excited, stop before we go too far.  
Let me be your bodyguard. (Living in my protection)  
we can just get ignited,  
what we had never known all our lives,  
I pray it's not too late,  
I would die by your side my love  
I'm the life that you save.

In this world of pain and sorrow  
every wish is your command,  
a heart like yours should never live alone.

I used to dream of a special one  
and now I feel it's coming true,  
but I couldn't let go, I'm a jealous guy  
what you're putting me through.

Let me be your bodyguard, (I can be useful to you)  
we can just get excited, stop before we go too far.  
Let me be your bodyguard. (Living in my protection)  
we can just get ignited, stop before we go too far.

Let me be your bodyguard, (I can be useful to you)  
we can just get excited, stop before we go too far.  
Let me be your bodyguard. (Living in my protection)  
we can just get ignited,  
Let me be your bodyguard, (I can be useful to you)  
we can just get excited, stop before we go too far.
