Bee Gees, Hold On

Today you came by to tell me you are leaving me And to say that the love And all that we knew had just drifted away And I look in your eyes And I couldn't bear the pain I felt inside of my heart To think that I'm gonna be lonely again And if ever you go then I know at a glance I don't stand a chance

Hold on to my love I'm nothing And I can't get along without you You're the light of my life And no living without your love

It's so hard to believe that you're going away Couldn't make me feel so down 'cause I know that from this moment on I won't have you around And if ever you go then I know at a glance

That won't stand a chance

Hold on to my love I'm nothing And I can't get along without you You're the light of my life And no living without your love

Oh oh baby Nobody's taking your place But for you , but for me Our love would live on for the whole world to see

So hold on to my love, I'm nothing And I can't get along without you You're the light of my life And no living without your love

(repeat last verse 2 times and fade out)
