

# Bee Gees, Just In Case

Well, it seems every night and day, I get to lose  
And I always held the faith inside  
That love would find a way  
And I always reached for more than the others ever saw  
I was always the first to follow my foolish prayer  
And the feeling that I have is more than any soul could bear  
Hold me when I wake  
Then I can be sure of who I am  
I'm half the man I should be, when you're gone

And you're telling me this is love,  
But just in case, keep my heart in a secret place  
Safe under lock and key, 'til I know it's only me  
One of us got to be the one that's true  
One for the other and the love comes through  
Right here or out in space  
Give my heart to you, babe, but just in case  
Yeah, just in case

Tell the world that I've come to claim your tomorrows  
Let the universal word go out a million miles away  
And let history show  
On the wind the seed is sown  
We are living in a time where the tears fall where they might  
But we hear each other much more than those who see  
We are not alone  
Love is there for everyone who needs  
And for anyone who cries  
I will always have you here with me  
Ohh

And you're telling me this is love,  
But just in case, keep my heart in a secret place  
Safe under lock and key  
'Til I know it's only me  
One of us has got to be the one that's true  
One for the other and the love comes through  
Yours, mine, and face to face  
Give my heart to you  
But just in case  
Yeah, just in case

Ahhh, ohhh baby, ahhh, ohhh, ohhh baby, ahhh

And you're telling me this is love,  
But just in case, keep my heart in a secret place  
Safe under lock and key  
'Til I know it's only me  
One of us has got to be the one that's true  
One for the other and the love comes through  
Yours, mine, and face to face
