

# Bee Gees, Miracles Happen

You know miracles happen  
If we just try we can put it back together, you and I  
And all the bad is blown away  
I never said goodbye  
Is the writing on the wall that makes you see  
And it's the savior of my soul  
And what I say that must be heard  
With love in every world  
Close your eyes don't let go  
Don't get lost in the falling snow  
Always out of place alone  
With someone your not sure of  
Broken wings don't arrive  
It's a storm but you still survive  
Gonna take a miracle  
So I go around believing you  
Say good night, stay forever and  
Nobody knows how much  
I pray for you at night  
And miracles happen  
Yesterday  
There was nothing in my life worth living for  
You were there and I was born  
The very strength to carry on  
A miracle has come  
Hold on tight call my name  
Don't get caught in the midnight rain  
Part of me believes in you  
You're someone I'm not sure of  
Don't look down I'll be there  
Like the wind in the cold night air  
I can see a miracle  
And through it all we rise and fall  
Tear it apart and stay forever  
I know where heaven is  
And somewhere in between  
Miracles happen  
Red, blue, black and white  
True light shine on anyone  
Two hearts make it right  
And all that love can change  
Close my eyes don't let go  
I'll be lost in the falling snow  
Always out of place alone  
With someone I'm not sure of  
Don't look down I'll be there  
Like the wind in the cold night air  
I can see a miracle  
And through it all we rise and fall  
We tear it apart and stay forever  
I know where heaven is  
And somewhere in between  
Miracles happen  
Hold on tight call my name  
Don't get caught in the midnight rain  
Part of me believes in you  
You're someone I'm not sure of  
Don't look down I'll be there  
Like the wind in the cold night air  
I can see a miracle
