

# Bee Gees, Smoke & Mirrors

When I was a boy, all the books I read  
I followed like a blind man  
To heed the words my father said  
Those golden summers faded into night  
Words become a dream  
The echoes of my childhood and where the path is winding  
May God bless you  
Keep you safe from harm  
I will stand by you always  
Time and motion  
Hands touch lips find a  
Way to Heaven on high  
Watch the children play, child becomes a man  
And all the tangled webs we weave  
You swear it as you live and breathe  
We stay together death until you part  
Winner takes the prize  
The future's at your fingertips right before your eyes  
No more sorrows  
Smoke and mirrors  
No more nights with no end  
I really learned a lot  
I see my tomorrows  
Smoke and mirrors  
And nothing from nothing  
And ashes to ashes they say  
All the more that you reach out  
The more that it runs away  
Smoke and mirrors  
Smoke and mirrors  
No more sorrows  
Smoke and mirrors  
No more nights with no end  
I really learned a lot  
I see my tomorrows  
Smoke and mirrors  
No more goodbyes  
That's all I ever got  
No lies, you find your way there  
Smoke and mirrors  
Show me what she's got, smoke and mirrors  
Heaven on high  
May God bless you  
Keep you safe from all harm  
I stand by you always  
Time and motion  
Smoke and mirrors  
Hands touch, lips find a way to  
That's all I ever got  
Heaven on high  
Smoke and mirrors  
No more sorrows  
I really learned a lot, smoke and mirrors  
No more nights with no end  
Show me what she's got, smoke and mirrors  
I rise or I fall  
No more goodbyes  
She really makes me hot, smoke and mirrors  
No lies, you find a way there  
Heaven on high
