Bee Gees, The Chance Of Love

You and me we're both the same
In this life a lonely game
I used to be a happy man
And now I understand just what it's all about
I never had a doubt on the chance of love

As a boy I lived down here
I always saw you near
To be together was happiness
And I just can't forget the moment we first kissed
I'd like to try again on the chance of love

Yeah, on the chance of love I'll do anything to get you by my side On the sound of love I will love you girl You'll be mine

All the world would then be free An apple falls from an apple tree You and I will be together And you will understand when I take your hand I'll open up the door to the chance of love
