

Bee Gees, This Woman

Bee Gees

Miscellaneous

This Woman

Well she walks like you in so many ways

It's a different look

It's a different time of day

One look in her eyes

How can I make you understand

She's the one good thing that's happened in so many years

There's been so many tears

When we lost the dream

And the winter came

And you said goodbye

And I don't want another reason to cry

You be all you wanna be

You got the longest night

Baby, be alone

I share my dream with someone else

I don't wanna talk about her

This woman - she's tearing my world apart

This woman - don't know what she's doing

This woman - touches me and I lose control

She's living inside my soul

This woman - I don't even know her name

This woman - don't know what she's doing

This woman goes through me like a hurricane

Falling in love again

To make those long legs mine - is all I care about

She's got so much to give - I got to be the one

I got to have

Someone to hold

I got to make it with that woman

When the nights get hot

And she goes walking by

And the city lights - and the city lights

They make you blind

I go insane

But am I crazy if she feels the same

You believe what you believe

You got the darkest night

Baby, be alone

I take my love to someone else

She was made to measure for me

You be all you wanna be

You got the longest night

Baby, be alone

I share my dream with someone else

I don't wanna talk about her

This woman - she's tearing my world apart

This woman - don't know what she's doing

This woman - touches me and I lose control

She's living inside my soul

This woman - I don't even know her name

This woman - don't know what she's doing

This woman goes through me like a hurricane

Falling in love again
