

Bee Gees, Words And Music

Words and music makes a song
For a love to sing along
Like a choir within the air
There'll be music everywhere

A bitter tear across your cheek
A smile for you is all I need
You give me cause to breath the air
There'll be lovers everywhere

CHORUS

I'll be your singer and your song
For all the love you brought along
I'll be your day
I'll be your night
I'll see that everything's alright

I'll turn the ocean into sand
Like my heart at your command
I'll make the raindrops turn to snow
And then everyone will know that we're in love...

And when the morning brings us light
Misty moonlight says goodbye
My hands are shaking when you smile
You make me feel just like a child

My mind is searching for a way
So that you won't have to say
You've got to know I can't come back
But I can't take you make me sad

Repet Chorus (2x)
