

# BeForU, Red Rocket Rising English Edit.

Painting the sky, the image within  
too big a sky compared to where I'm in  
But the star I drew was shining so bright  
Always twinkling, a spark in the night  
In this tiny palm of mine  
such a dream, and ambition so big  
now that it's looking, searching a way,  
cut corners to get out of this place  
Shoot out to the sky,  
oh my red rocket, jump to the sky  
go straight ahead now, right in the wind's eye  
fight towards the wind  
past is what you have to leave,  
go beyond the rainbow  
Go on now!  
look for the cloud in a shape of a whale  
what to do you see in the sky that's beyond  
let go of yourself,  
your dream will go on  
when you jump out of your world so let it go  
There was no map to be found in my sight  
but my eyes are looking where I wanna be  
path I take is got to be the right way,  
no one's gonna tell me it's wrong  
Clumsy world stands out from basic rules  
starts to shine with all the glory inside  
brighter than the most perfect jewel,  
precious diamond in the sky  
Shoot out to the sky,  
oh my red rocket, rise to the sky  
still not so perfect but oh let me fly  
go straight ahead  
through the hazy clouds.  
what will I find in tomorrow?  
Will I keep on  
facing my back lost in where to go  
just looking towards the distant sky  
"How can I fly?"  
said to myself but I'll try,  
reach out with all of my might  
Why not break through the routine you have  
dive into the unordinary day  
make it happen, a miracle way  
shoot for the goal no one's been, that's your power you know  
You can take it!  
higher and  
brighter and  
higher and  
brighter so  
shine on boy  
shine on girl  
into the sky!  
Blazing, the stars are so bright,  
let me hear the melody they chant  
Beyond all the reality, take me over the dream  
my rising red rocket take me afar  
oh take me there  
although I still cannot see what will come in my days ahead  
but yes,  
i'm gonna make it  
that's what I believe  
a new sky spreads in where I go
