

# BeFour, Come Fly With Me

We have ignition its time to go  
A mission out of here  
Youre heart is beating  
The lights go out  
The thrill is in the air  
Everything change in a second  
And the darkness surrounds you like night  
But just in a minute a million of stars comes alive  
Come fly with me  
Into infinity  
Reach for the stars  
They never been so close to you  
You took a step  
Into our fantasy  
And we take you to the end of the galaxy  
Come fly with me  
A journey out of time and space  
Can take you anywhere  
Imagination fascinates,  
The magic fills the air  
Everything change in a second  
And the darkness surrounds you like night  
But just in a minute a million of stars comes alive  
Come fly with me  
Into infinity  
Reach for the stars  
They never been so close to you  
You took a step  
Into our fantasy  
And we take you to the end of the galaxy  
Come fly with me
