

Bell Book and Candle, Get out

Someone whispered in my ear
that she likes the way you talk
so it took my breath away
and I watched your every step
though I'll miss you
but I say good bye
get out of my head
go now - close the door
get out - I don't need you anymore
I'll get over you
go now - we are through
get out - you don't need my like I do
now you're standing right in front of me
you raise your eyes
no one's gonna keep me from the pain
I realize
though I'll miss you
but I say good bye
get out ...
