

Belvedere, And You Thought The Doctor's Probe

When I think about June 14th it's not something they want me to remember
All I know on that day was that they did it a single song to remember
And I look on that day, til then I never had a problem that I mention
But on that day, I looked up to the sky to see this piercing way
That pulled me towards it, they took me from this place

When attempted by my right to be abducted freely without pain
They tell me it's commonly the same
They looked around and tampered with my mind
And left me on a bail of hay outside

On a summer day, June 14th, I learned there's more then what we know as beings
All I know, it's useless telling people what happened, no one will believe me
I look on that day, I finally found a getaway spot for a vacation
When all it takes, is looking to the sky and see that piercing way
That pulls me towards it and took me from this place

When attempted by my right to be abducted freely without pain
They tell me it's commonly the same
They looked around and tampered with my mind
And left me on a bail of hay outside
