

Ben Bledsoe, Lonely Heart

The sunny days with you
The funny things you do
That make me want to be with you
I've never been the same
Since you went away
And I will wait right here for you

You changed my life
You changed it in one night
Turned darkness into light
And now you're gone
But I keep holding on
I've gotta be so strong

My world is moving to the rhythm of my lonely heart
I can't stop thinking 'bout you ever since we've been apart
My world is moving to the rhythm of my lonely heart
My heart

Your kisses felt so right
Guess I'm missing what went wrong
Was it something that I said to you
I've never been the one
To just get up and run
But now I run for you

You changed my life
You changed it in one night
Turned darkness into light
And now you're gone
But I keep holding on
I've gotta be so strong

My world is moving to the rhythm of my lonely heart
I can't stop thinking 'bout you ever since we've been apart
My world is moving to the rhythm of my lonely heart
My heart

The sunny days with you
The funny things you do
That make me want to be with you
I've never been the same
Since you went away
And I will wait right here for you

My world is moving to the rhythm of my lonely heart
I can't stop thinking 'bout you ever since we've been apart
My world is moving to the rhythm of my lonely heart
My heart
