

Ben Jelen, Come On (May Need Revisions)

And finally the silence
looking out, looking back across the sky
trying to find a meaning, knowing that i just left it all behind
still i smell a lingering softness,

where did she go, how did she go, I wanna, i wanna know
I wanna know that she'll be coming here, to me
Come on, without you all that i feel, the love inside of me
Come on, you know that we belong
Come on, come on, come on come on

Thinking back before her
I never knew the meaning of alone
Still the flag is feelin foriegn
I live the day to escape into a phone
Speaking of the word not given

where did she go, how did she go, I want, wanna know
I wanna know that she'll be coming here, to me
Come on, without you all that I feel the love inside of me
Come on, you know that we belong
Come on, come on, come on come on

cause shes got the kisses, that my heart misses

She's coming,
she's coming here to me
i'm needing, desiring
To kiss her now, I', living for her,
breathing for her, singing for her, her fairy tale

Come on, without you all that i feel the love inside of me
Come on, you know that we belong
Come on, come on, come on come on

Come on, without you all that I feel the love inside of me
Come on, come on, come on come on, come on, come on
