

# Ben Kenney, Wrong

Where did this all go wrong?  
Was I missing it all along?  
Is it coincidence that the craziest fools have the strongest belief that they're right  
Without all due respect there's a three headed monster that's eating your children alive  
Where did this all go wrong?  
Was I missing it all along?  
Every single day  
I have less and less to say  
Are you so sure you're right?  
Do you say things beyond your sight?  
Well, is it safe to assume that the greatest unknown is inside you and forcing your hand  
Do you feel warm inside when you think about cussing the things you don't understand  
Every single day  
I have less and less to say  
Every single day  
I have less and less to say  
Where did this all go wrong?  
Was I missing it all along?
