## Ben Lee, Light

You were the one that brings the weather You were a dream I've had forever You know exactly what I'm wishing Your gonna love me in to submission

Feelings I had while at your feet those kinds of things I can't repeat Your gonna fill the world with light.

You put the point in exclamation You took a day to build a nation Your gonna teach me how to live Your gonna teach me how to give

Feeling i had
Well who could say
I could explain them anyway
Your gonna fill my world with light
Your gonna fill my world with light
