

Ben Saunders, No Cure

I've got this fever running through my veins
I keep on trying but I just can't shake it
All this medicine that I keep takin'
It ain't working
I keep on hurting, something more
What if there's no cure?

Pick me up take me back to my bed
Put a glow towel along my head
You should dry some of this instead
Then you tell me that it's working
I'm not sure
What if there's no cure?

I'd been blind since you left
I can see you way out
I been there since you went
So any words of hope now
And the scary thing is it ain't getting any better
What if there's no cure?

I light a candle and I say a prayer
'Cause I might need a miracle right here
'Cause I'm fading and I feel so scared
I'm disappearing I used to feel so much more
What if there's no cure?

I got this fever running through my veins
I got this fever
I'd been blind since you left
I can see you way out
I been there since you went
So many worse of hope now
And the scary thing is it aint getting any better
What if there's no cure?
