

BENEE, Never Ending

Has your heart ever been broken, torn apart without you knowing
It's funny when you lose your bearings but you didn't see it coming
Treading hard inside the water, but they're keeping your head under
Hard to get up feeling somber
Things are worse now days are longer

Was it something that I said
When you look at me I feel resentment Was it something that I said
When you look at me I feel resentment

Push me over failed lover
Am I just not enough for ya
So much power in your hands and you just cut me off like nothing Try moving forward, for what it's
We tripped and fell, a long way down a long way down
What do we have when nothings left when nothing works?
A long way, a long way down

When I was younger no preparing for this kinda stuff Miserable but if we fall we're just looked down
Cause I've had enough
Told to Keep it all together Smile for everyone

Push me over failed lover
Am I just not enough for ya
So much power in your hands and you just cut me off like nothing Try moving forward, for what it's
We tripped and fell, a long way down a long way down
What do we have when nothings left when nothing works?
A long way, a long way down

It's a never ending thing with you
I think about your face too much
I want to follow every move
Don't like it when we're out of touch
It's a never ending thing with you You ruin everything you touch Ruin everything you love
It's a never ending thing with us
It's a never ending thing with you think about your face too much
I want to follow every move
Don't like it when we're out of touch
It's a never ending thing with you You ruin everything you love
Go ahead and mess things up
It's a never ending thing with us
It's a never ending thing with you Think about your face too much
I wanna follow every move
Don't like it when we're out of touch
It's a never ending thing with you You ruin everything you love
Go ahead and mess things up

It's a never ending thing with us
