Berman, Everything

So-long to good old yesterday it's been real but time will not stand still so-long to good old apathy it's been real but now you see that all this is dead

you'll see its everything... you'll never be you'll see its everything... you'll never be this time it's you it's me it's everything you'll never be this time it's you it's me it's everything you'll never be

so-long to all these little games it's been fun but look at what it cost sit back and find another way to live life like it's not only hiding from shame
