

Between The Trees, You Cry A Tear To Start A R

Stand close to me
Dont sail away baby
Let them see your heart
Let them see just how beautiful you are
So you head
On down
To the bottom near the river
Just to wash away
All the pain of today and yesterday and you tried so hard to wash away the spots
But your tears dont seem to do enough
Its just too much
But darling grab a hand we promise not to let you stand alone
Stand close to me
Dont sail away, baby
Let them see your heart
Let them see just how beautiful you are
You are like nobody else you see
Nothing less than any girl in your magazine
Dont you know youre special?
Youre really something special, baby
So you look into,
You look into the water and there you are
Just the way you left your self all alone
But lift your head and look across the water
Cause there you see all of us together
So darling grab a hand we promise not to let you stand alone
Stand close to me
Dont sail away, baby
Let them see your heart
Let them see just how beautiful
You are like nobody else you see
Nothing less than any girl in your magazine
Dont you know youre special?
Youre really something special, baby
(La La La La)
Darling grab a hand we wont let you go
Darling grab a hand we promise not to let you stand alone
Stand close to me
Dont sail away, baby
Let them see your heart
Let them see just how beautiful you are
You are like nobody else you see
Nothing less than any girl in your magazine
Dont you know youre special?
Youre really something special, baby
(La La La La)
