

Bien, I Want You

I want you
There's she goes blessing me with visual
Halo over your hair
Take it off take it off take it off
Give it all to me yeah

How you standing so far
But you're pulling me closer
Like a diamond in the dark
See the way that you're shining
It's the way that you are
I don't feel like this often
Now you caught me off guard
And you got my attention

I want to experience your silhouette I'm curious
I'm wanting your experience your silhouette I'm curious
I want you

This feeling I won't find with no nobody else but you
See nobody in this room
No nobody else but you darling
I got plans inside my mind don't want nobody else but you
Choose nobody else but you
See nobody else but you

How you standing so far
But you're pulling me closer
Like a diamond in the dark
See the way that you're shining
It's the way that you are
I don't feel like this often
Now you caught me off guard
And you got my attention

I want to experience your silhouette I'm curious
I'm wanting your experience your silhouette I'm curious
I want you
