

Biffy Clyro, I hope you're done

Any time i wander through your heartless night,
words have all but left me, freezing in my mind
You are my peaceful love,
now it's just shattered people
Every time i wander through your heartless night,
words have all but left me, freezing in my mind
You are my peaceful love 'til we believe in something
Open your eyelids,
see what you've done, violence ends so many
Softly you've spoken, people you've helped,
come and hide and never sleep
What can feel you?
i can feel you,
i hope you're done
