

Big D And The Kids Table, Try Out Your Voice

I was talking to a young man at a party in these war days
And he asked me my thoughts
I talked about peace, fighting for the people, he scowled then walked away
Told me my views are fucked

We scream, we cry, the message has amplified
But they won't hear the people's voice
We scream, we cry, the message has amplified
But they won't hear the people's voice

Come on suits it's time to show us something
You know it's time for better days
Come on suits it's time to show us something
Just get your hearts out front, and prove your something

Remember being proud, remember feeling loved, remember when leaders gave sacrifice
I believe all men don't have a price
Truth in the state of the union address
Truth in this political process
I should not have to sing in for this

We scream, we cry, the message has amplified
But they won't hear the people's voice
We scream, we cry, the message has amplified
But they won't hear the people's voice
Come on suits it's time to show us something
You know it's time for better days
Come on suits it's time to show us something
Just get your hearts out front, and prove your something

Try out your voice, now use it, now use it, we are the people
Try out your voice, now use it, now use it, we are the people
Try out your voice, now use it, now use it, we are the people
Try out your voice, try out your voice, just try out your voice
Now use it, now use it, we are the people
