

# Bigbang, From A Distance

Don't you know you better get some sleep  
you better get some sleep now  
but all you're gonna do is run out there  
and hide in the sound  
looking good from a distance  
while you're dancing around

no slowing down no one with questions around  
a soul left behind is more than a matter of time  
sing you will rise and shine

Everybody's gonna get somewhere  
gonna get somewhere now  
everybody's going faster  
and faster somehow  
looking good from a distance  
while you're dancing around

Cars and pearls in line  
you can see how they shine  
the thrill of a crime  
but hear them desperately crying  
we will rise and shine  
looking good from a distance  
while you're dancing around  
me running down the platform  
you're waving your hand  
don't know where you lost it  
I don't understand

Looking good from a distance  
and all the way from the shore  
the oceans will roar and drag you in  
good-looking from a distance  
while you're dancing around  
I'm running down the platform waving my hand
