

Bijou Phillips, Just Look Around

I'll never get too cold with you
I'll never lose control
And you will never see darling
All these things I'll never show
And you'll just say I'm so naive and yours alone
But I can't be anything to anyone
Just look around
And you won't find anyone who's anything, anyhow

You don't really get angry
So I don't have to care
You know you're just seeing things baby
That were never really there
It's just a little show loev
Some crying in the bed
Run your fingers through my hair and kiss me once again
Just kiss me

Because I can't be anything to anyone

Just look around
And you won't find anyone who's anything, anyhow
And you can't be everything to everyone
I have found
And you won't find anyone doing anything for anybody anyhow
Anyhow

I never really thought too much
About where this would go
But you can call me anytime
I'm still your friend you know
So get up off your knees now baby
And don't you cry no more
Cause I can't be anything to anyone
Just Look around
And you won't find anyone who's anything anyhow
And you can't be everything to everyone
I have found
And you won't find anyone doing anything for anybody
