

# Bill Nye, Always Dry

There are places on this here planet  
Where you have to be alert  
When you go there you have to plan it  
I'm talking about the desert

There is little rain or snow  
You might ask yourself why  
Something you should already know  
Is deserts are always dry

Animals and plants have found  
Ways to store water  
And camels can go dozens of days  
Even when it's hotter

From Antarctica to the Sahara  
Just ask a snake or the cacti  
If they could talk they should tell ya  
Water's in short supply  
Deserts are always dry

But don't be fooled about the desert  
It's not always hot like you're told  
Or full of cactus, snakes and dirt  
Some deserts are even cold  
But not a lot of water there  
The main thing that I'm told

From Antarctica to the Sahara  
Just ask a snake or the cacti  
If they could talk they should tell ya  
Deserts are always dry  
Just ask Bill Nye
