

Bill Nye, Atoms In My Life

[Note - Two versions of this song exist, both with different sections. Lyrics exclusive to the Disney

My hat or a flower, the water, a shower
Some coffee or a bicycle
A frozen popsicle
Combination, atomic combination
Matter's cool, it's made with molecules
And did you ever think about the molecules
The bond is very cool, very very cool
The stars and planets are made of
Are made of an atom combination

(D) And those atoms are so tiny you never see them
(D) Like hydrogen and carbon and oxygen
(D) We know that they exist, 'cause we can see how they react
(D) And there's only 92 of them you know that

Atoms all combine
They make up molecules
Matter is all around
Atoms, atoms
(P) Atoms are so small
(P) You can't see them but we know
(P) They're there!
