

# Bill Nye, Baby I Love Your Wave

Ooh, energy moves in waves

Wavelengths grow so long before my eyes  
Look like curves drawn on a page  
Amplitude describes a wave's height  
Like a tower in the city  
But don't, on no, forget shape  
Cause all waves have the same, yeah

Ooh energy moves in waves, everyday, yeah yeah  
Whether soundwaves or gamma rays, that's its wave, yeah yeah  
Ultraviolet and microwaves

Visible light are light waves you can see, see, see  
They've got a quick frequency  
But don't, woah no no, forget shape, la de dah  
Cause all waves have the same, yeah yeah
