

Bill Nye, Cellular Haze

Living cells are in your brain
Living things are in your veins
Living cells run through your bones
They contain all your chromosomes

Living cells have DNA
Living cells die everyday
Animals have 'em, and plants do too
Cells make up me and you

Ooh, help me!
Help me!
Yeah yeah, living cells!

Living cells are specialized
They are what make things alive
Living cells have different jobs
In cows and corn on the cob

Whoa, help me!
Yeah yeah, living cells!
