

Bill Nye, Static Electricity

I've got some amber, I've got some cat fur
I think I'll rub one on the other and see
If the electrons
Can gather on one
And build up to charge it negatively
I'm on a roll, I want to rock
I want to give you such a shock

Cuz static electricity
With static electricity
Particles flockings
Electricity
It's static electricity
It's really shocking
It's static electricity
It's static electricity
People are talking
Electricity
It's static electricity
It's really shocking

Electrons when they gather together
They make a negative charge
The start of a spark

And clouds when they build up it really is no wonder
That when they discharge it's lightning and thunder
Lightning

And that is electricity
It's static electricity
Particles flockings
Electricity
It's static electricity
It's really shocking
It's static electricity
It's static electricity
People are talking
Electricity
It's static electricity
It's really shocking
