

Bill Nye, Stormin'

There's the sun up in the sky
It's heating places all around
At different rates the wind is made
Water evaporates into the sky

Storm clouds forming in the sky
Because cold air pushes warm air way up high

Barometer's been fallin' lately
A storm is on the way and maybe
We should all get ready baby
Here comes a hurricane

Now we're wet the rain is pourin'
Look out 'cause the wind is blowin'
Cold and warm air masses flowin'
It's all mixing up the atmosphere
