

# Bill Nye, There's Science In Music (Oh Yeah)

It's vibrations  
Sonic sensations  
That rattle the air in a wave we can ride  
A wave of emotion  
I've got a notion  
It's a journey we take through our eardrums inside

So just what you're sayin'  
The music I'm playin'  
Is making it's way in  
To my tiny brain?

It's really astounding  
When the music is pounding  
It's all just lovely patterns of sound

There's science in music, oh yeah  
There's science in music, oh yeah

Vibrations leap through the air  
And they get into your ear  
Every culture has music  
And the pattern is clear  
The thunderous beatin' of drums  
The rootin'-tootin' of reeds  
And blowin' blastin' of brass  
And twangy plucking of strings

There's science in music, oh yeah  
There's science in music, oh yeah

It's just so filled with emotion  
It's sound waves in motion  
Music makes us cry, then makes us laugh  
Or makes us feel tense, or filled with suspense  
By music inflected  
Our sense is affected

There's science in music, oh yeah  
There's science in music, oh yeah

Music can affect you emotionally  
It can even make you react physically  
Whenever I hear that funky sound  
I just gotta throw my body around  
My heart starts thumpin', my brain starts to groove  
And before I know it, my feet start to move!

There's science in music, oh yeah  
There's science in music, oh yeah  
There's science in music, oh yeah
