

Bill Withers, Look To Each Other For Love

Love can make us happy
Open up your heart everyone
And the world we all share down here
Is bound to make us happy

Let's look to each other for love
Look on the brighter side of life
And the world that we share
Can make us happy

Look to one another for love
Look on the lighter side of life
And the way that we are
Can make us happy

Don't be afraid
To show that we need each other
Cause I need you in my life
Let's look ahead
With faith that things will be better
If we just look up to the light

Look to one another for love
And everything will be alright
And the world that we share
Can make us happy

Let's look to each other for love
Look on the brighter side of life
And the world that we share
Can make us happy

Don't be afraid
To show that we need each other
Cause I need you in my life
Let's look ahead
With faith that things will be better
If we just look up to the light
