Billie, Safe With Me

I know that you're sad
hurt in the past
got you believing love wont last
it's not hard to tell
you've lost all your faith
don't blame us all for a fools mistake
friends they advise I should let got
they're calling you ice but I see you glow
you're making me crazy
what can I say
id do anything to take the pain away
when you gonna realise that you're lonely
I can see it in your eyes you don't have to be
when you gonna realise I'm the remedy
wont you give my love a try you'll be safe with me
you'll be safe with me
something so strong could take on the world
I'm not just talking about being your girl
the things I want us to do
get into me like I'm into you
walking in the park
watching leaves fall
lovers in the dark
counting every star
finally when you're trust is in me
I'll give you my love real slow and tender
when you gonna realise that you're lonely
I can see it in your eyes you don't have to be
when you gonna realise I'm the remedy
wont you give my love a try
you'll be safe with me you'll be safe with me
when you gonna realise that you're lonely
I can see it in your eyes you don't have to be
when you gonna realise I'm the remedy
wont you give my love a try you'll be safe with me
you'll be safe with me
you're here in my arms
and thats how I want it boy
when the morning comes
you'll know what I feel
so real
I dream of your smile
night after night
the one that you hide from the daylight
stop all those tears
doubt in your mind
leave all your fears way behind
repeat chorus to fade
